

# Bhavishya jain

✉ Bhavishyajain707@gmail.com |  LinkedIn |  Github |  Leetcode

## Summary

B.Tech student in Computer Science (AI & DS) with a strong foundation in Data Structures & Algorithms, solving over 100+ Leetcode problems with a current contest rating of 1509. Skilled in full-stack web development, including frontend development with React.js and Tailwind CSS, and backend development using Node.js, Express.js, SQL, and RESTful APIs. Currently building a live e-commerce platform as part of a client project. Passionate about delivering scalable, production-ready applications that combine coding with problem solving skills.

## Education

ITM SLS baroda university	July 2024-July 2028
B.tech in Computer Science(AI and Data science)	CGPA: 8.50

## Experience

### Freelance Web Developer — Client Project (Ongoing) Github

- Building a full-stack e-commerce platform using **React.js**, **Tailwind CSS**, **Node.js**, **Express.js**, and **SQL**.
- Designed and developed product listing, cart, and authentication systems.
- Created RESTful APIs for secure and efficient client-server communication.
- Collaborating with a client to implement features and deliver production-ready code.

## Projects

### Orderly — Full-Stack Web Github | Live app

Tech Stack: React, Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, bcrypt, Google OAuth, Vercel, Render

- Designed and developed the entire application (frontend & backend) for seamless order management
- Implemented secure user authentication using JWT, bcrypt, and Google OAuth
- Integrated email verification and OTP-based order confirmation
- Built a responsive, modern UI with Tailwind CSS and Next.js
- Developed RESTful APIs for authentication, order processing, and admin management
- Created an admin dashboard for managing users and orders (CRUD operations with role-based access)

### Portfolio Website: HTML, CSS, javascript, Vercel, Github Github | Live App

- Designed and developed a personal portfolio website to showcase projects, skills, and professional background.
- Utilized javascript to create a modern, component-based, and single-page application.
- Ensured a fully responsive design for optimal viewing on all devices.

### Proof Of Ink — AI Signature Verification: Github | Live App

Tech Stack: React, Flask, Python, OpenCV, scikit-image, Tailwind CSS, Render, Vercel

- Built an AI-powered signature verification system using computer vision and machine learning techniques to detect forged signatures
- Implemented HOG feature extraction and SSIM algorithms for accurate signature comparison and similarity scoring
- Developed a responsive React frontend with dual-mode interface: custom upload and pre-loaded sample testing
- Created Flask REST API for real-time signature processing and analysis with seamless frontend integration
- Deployed full-stack application on Vercel (frontend) and Render (backend) with production-ready configuration

## Skill Set

Languages: Python, C++, Javascript, SQL	Frontend: HTML, CSS, React.js, tailwind CSS
Backend: Node.js, express.js, RESTful API's	Databases: SQL and MongoDB
Tools: Git, Github, Postman	AI/ML: OpenCV, Pandas, Numpy, Matplotlib

## Achievements

- 5th Place out of 75 teams in *CodeClash* Coding Contest –ITM College
- Earned the 50-Day Streak Badge on LeetCode
- Solved 100+ problems on LeetCode, Current Contest Rating: 1509
